You expected to feel lighter, not older.

Rapid weight loss often brings an unexpected mirror moment: sharper cheekbones, tired eyes, loss of softness around the mouth. The compliments on your body are followed by quiet questions about your face.

At The Aura Clinic, we understand this paradox. You did everything right — yet something feels off.

Understanding your journey

Why It Happens

Weight-loss injections reduce fat globally, including the delicate facial fat pads that sustain youth and balance. This can create hollow cheeks, sagging skin, and loss of facial harmony.

Dr Dayal restores facial balance through phase-based precision, applying volume in millimetres, not millilitres.

The Aura Restoration Method

A phase-based approach to restoring facial harmony with precision and subtlety

STEP 1

The Assessment

Identify lost support areas.

STEP 2

The Blueprint (Phased Plan)

fillers, bio-stimulation, and tightening.

STEP 3

The Precision Application

Doctor-led procedures using premium injectables under strict Harley Street safety protocols.

STEP 4

The Natural Result

Restoring softness and symmetry while keeping the patient's authentic expression.

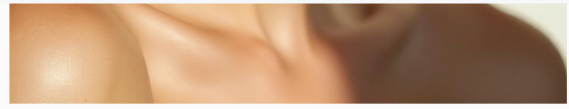

The Transformation

Imagine seeing yourself again — refreshed, not altered.

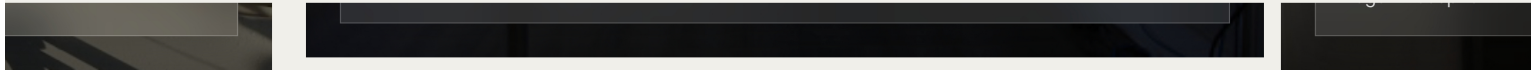

Colleagues say you look well-rested. Friends say you're glowing.

No one knows what changed — and that's exactly how it should be.

Tour The Clinic

Experience the refined environment where artistry meets precision.
